HIGHLIGHTS

1. Since end of last year year, displacements of population have increased significantly, reaching the figure of 921,471 internally displaced people by the 7th of June 2020.

2. Centre-North and Sahel regions remain the most affected regions of the country, with respectively 42% and 33.6% of the total registered displaced population. They are followed by the Nord (7.8%), the Est (7.1%) and the Boucle de Mouhoun (3.5%). Displaced population are also seeking for refuge in other regions of the country, like Plateau-Central (1.5%) and Hauts-Bassins (1.5%).

KEY FIGURES

| Cluster partners | 17 |

People

Households (7.00 people per household)

- Needed: 30,000
- Targeted: 25,000
- Reached: 8,300

Shelter (Total)

Targeted: 56,689
Reached: 34%

Funding

- Total funding required: $30.3 M
- Funded: 39%

KEY DATES

- 13.07-17.08.2019: Global Shelter Cluster mission
- 22.08.2019: Deployment of national Coordinator
- 08.2019: Deployment of IMO
- 18.11.2019: Deployment of deputy Coordinator

COVERAGE AGAINST TARGETS

Households (7.00 people per household)

NEED ANALYSIS

Rainy season is challenging the shelter response as many households have seen severely affected their shelter and require support at the same time that the planned shelter response needs to be adapted to access constraints due to floodings. Within the COVID-19 situation displaced and host population that were in overcrowding conditions needs urgently shelter and NFI support in order to prevent the spread of the virus.

Assessing new sites with the authorities and planning them is an important priority. Specifically in urban areas, where the planning of new settlements is key to decongesting the housing situation, guarantee the access to services and prevent the deterioration of the population health condition. At the same time, the access to new available land to settle new displaced population added to the previous one is an important challenge faced by the cluster partners.

RESPONSE

Shelter partners are currently reviewing from the technical prespective the shelter response in order to better adapt it to climate challenges and the displacement during, starting some mid-term shelter solutions.

Measures of adaptation of the shelter activities to COVID-19 context have been discussed within the Shelter Cluster to prevent the transmission of the virus and support the authorities and Health and Wash Clusters in their sensitization campaigns. The totality of active shelter partners are either delivering their planned shelter responses or being prepared for it.

A revision of the Humanitarian Response Plan 2020 has been done and the shelter...
population in need and target numbers have been updated. Priorities for the second half of the year have been discussed within the Shelter Cluster Strategic Advisory Group.

**GAPS / CHALLENGES**

Geographical coverage remains challenging due to the added difficulties in access to the some areas most affected by the attacks. Multiple displacement and already there have been experiences of beneficiaries of emergency shelters that had to dismantle, transport and reinstall the shelter in a safer area.

Access to adequate land represent one of the key challenges and some displaced population have already experienced a relocation due to flooding damages in their previous land.
